Company Information Last Month of Tax Year (e.g., Dec)? LLC Partnership Tax Type: C-Corp S-Corp Schedule C 501(c)3 Other: On which basis do you file your tax return? (Circle One) Accrual Cash Not Sure Owner Information: % Ownership _____ Owner 1: _____ % Ownership _____ % Ownership _____ What is your industry? Previous Consulting Who prepared your most recent income tax return? (Please provide the name of the organization, your contact, and phone number.) Are you currently a client of this tax preparer? No If yes above, what additional services, if any, does this tax preparer provide your company (e.g., write-up services, financial planning, income tax planning, payroll preparation, sales tax return preparation, etc.)? Do you receive accounting support or accounting software consulting from any accountant other than the tax preparer you noted above? (Including contract bookkeeping support?) Yes If yes, who provides these services and what services do they provide? Income Tax Return History As of the date of this interview, has your company filed all income tax returns to the IRS and all applicable states? _____ If no, please list each taxing authority and the tax year involved: Authority: Fiscal Year End Authority: _____ Fiscal Year End _____

Authority: _____ Fiscal Year End _____

QuickBooks Goals I am immediately interested in using QuickBooks as a: (Check One) ■ Basic, Streamlined Use Tool for tracking certain financial information for my company (e.g., keeping cash current and tracking what customers owe me). My accountant will gather most of the financial information necessary to prepare my tax return at the end of the year using financial information other than QuickBooks reports. ■ Involved, Thorough Use Complete bookkeeping solution so that I have all, or almost all, of the information in QuickBooks that my accountant will need to prepare financial statements (Balance Sheet, Income Statement, and Cash Flow Statement) and my tax return. However, I don't intend to use the financial information in QuickBooks to make significant decisions regarding the management of my company without the direct assistance of my accountant. ■ Maximum Use that Includes both Data Entry and Business-specific data entry /reporting Complete bookkeeping solution that includes almost all of the information my accountant needs to prepare my tax returns as well as all of the critical reports I need to make significant management decisions about my company. Note: Using QuickBooks at this level could involve more complicated data entry methods that may necessitate additional employees and/or additional training for your employees. Using the program at this level may also require the integration of QuickBooks with other accounting solutions. We will notify you of all estimated costs before implementing QuickBooks at this level. In most situations, it is best to implement QuickBooks in phases so that we accomplish this level of reporting over a period of no less than 6 months and no more than 2 years. QuickBooks Licenses, Users and Networking How many people in your company will use QuickBooks? How many computers will run QuickBooks? Will you host the QuickBooks data on a dedicated server? On a scale of 1 to 10, 1 being no bookkeeping experience and 10 being a bookkeeping expert, rate the skill level of your bookkeeping staff. (Include the owner if the owner will do any QuickBooks data entry. Use the back of this page for additional bookkeepers.)
